DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a method of inhibiting the generation of ceramide from sphingomyelin.

Group II, claim(s) 4-7, drawn to a method of treating a pathophysiological state characterized by endothelial apoptosis.

Group III, claim(s) 8-10, drawn to a method of treating sepsis or an individual at risk of sepsis.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions are directed to distinct and multiple methods. PCT Rule 13.1 does not provide for multiple inventions, but only to a single invention or a group of inventions which are so linked to form a single general inventive concept. A

combination of 3 distinct methods is not a proper combination of inventions which are considered to have unity of invention (see 37 CFR 1.475 (b), (c), and (d)).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
